PROJECTS

ACTIVITY DETECTOR AND ALERT GENERATOR - Image processing, Machine learning   Jan 2023 - Apr 2023
When any anomalous activity is caught on the camera which is embedded with the trained model, As soon as it detects the anomalous behavior or any violent actions it will give an immediate alert to the police patrol and control room the anomaly data video is sent to the control room where they can immediately take action to avoid to prevent the suspect escape from the area.

Employee Salary Management system - Full stack development   Jul 2023 - Sep 2023
Its a Dynamic web page for handling employee salary management developed using PERN Stack

Quick-Cart - Android development, AI   Jan 2025 - Apr 2025
Our project uses data analytics and AI to optimize personalize shopping and improve operational efficiency by reducing checkout time with automated billing, and delivers tailored shopping suggestions, enhancing the customer experience. Long billing queues often lead to customer frustration While Existing solutions offer cashier-less checkout, it requires costly infrastructure (Amazon GO) Our app provides real-time, personalized customer experience, reducing checkout time with automated billing, and allows cash payments and all required features for user convenience The solution is cost-effective, scalable, and provides actionable insights for retailers, creating a seamless shopping experience with reduced queues and improved store operations

Asset in hand - full stack development, fintech   Jul 2024 - Nov 2024
This is an asset management app which manages all type of your assets both the liquid and non-liquid, which also updates the real time value of the asset your holding
Planned future implementation:
recommendation system which recommends on how to manage the asset
Asset planning recommendations according to age and responsibilities
